

Traditional Confection

SEEDS 2000 Sunflower Hybrids

6946

An industry leading confection hybrid producing consistent yields across a wide range of environments. Large seed size and excellent dehulling percentage make **6946** an exceptional choice for all confection markets.

- Proven high yielder in northern regions
- Large seed size
- Easy dehuller with high nutmeat percentage

6950

6950 is part of a new generation of hybrids that fit the northern growers. **6950** offers large seed size with improved length and agronomics versus 6946.

- Excellent yield
- Large seed size
- Improved agronomics

Panther DMR

Panther DMR is a high yielding, early maturing single-cross hybrid with **genetic resistance to multiple races of downy mildew**. It's shorter plant height combines with strong stalks and roots for excellent standability. **Panther DMR** produces the large, long and dark seed suitable for in-shell and dehull markets.

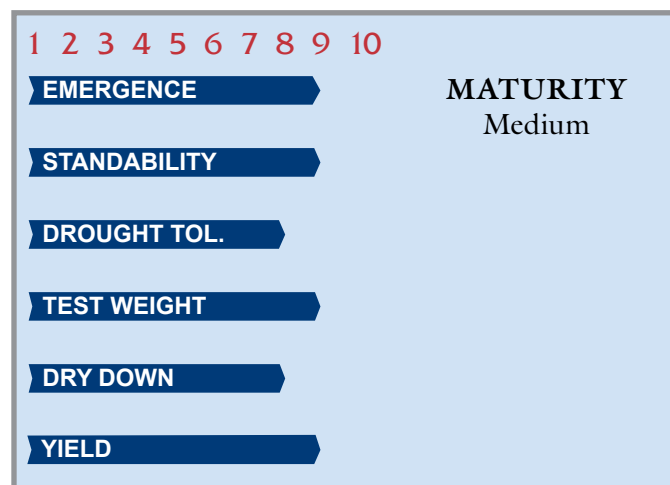

- High yield potential
- Outstanding late season plant health
- Strong stalk and roots
- Shorter, uniform plant type
- Genetic resistance to multiple races of downy mildew

Sundance

Sundance is a medium maturing, modified single-cross confection hybrid with very dark color and excellent seed size. **Sundance** has excellent tolerance to early ripening diseases and is a widely adapted both north and south.

- Medium maturity, widely adapted hybrid
- Excellent tolerance to Phoma and Phomopsis diseases
- Excellent root and stalk strength
- Long, dark seed

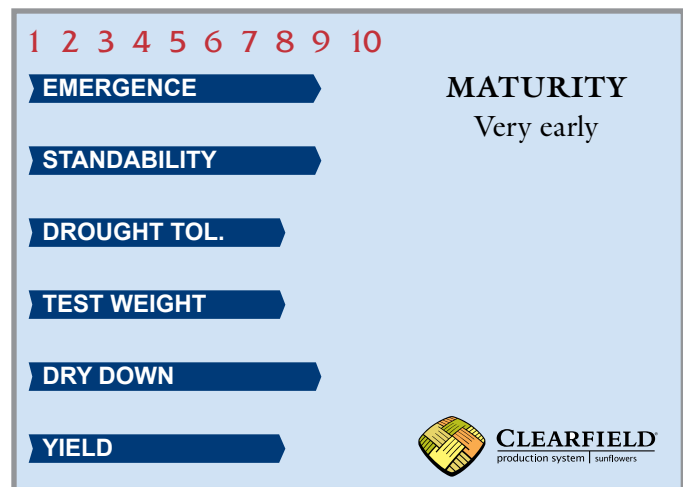

CLEARFIELD® Confection

SEEDS 2000 Sunflower Hybrids

Jaguar Brand

Jaguar is a very early maturing hybrid that produces the large, long, dark seed preferred by processors for the in-shell market. **Jaguar** has above average stalk and root strength resulting in excellent standability. **Jaguar** is suitable for northern production areas and for late planting in southern areas.

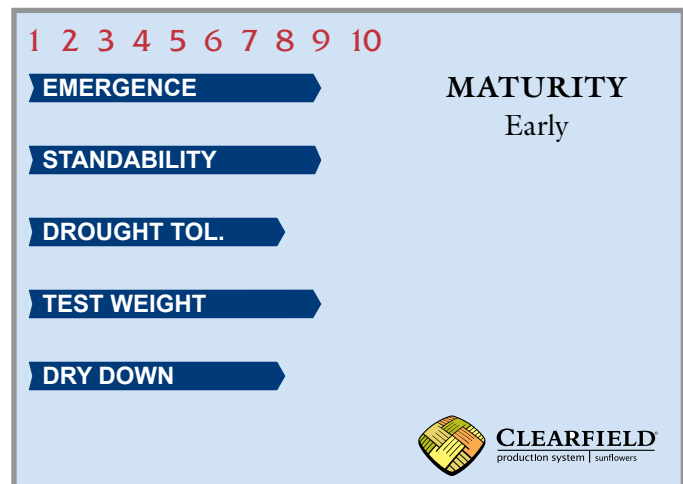

- Large, long, dark seed
- Excellent standability
- Very uniform single-cross hybrid
- Beyond® herbicide tolerance

Jaguar II Brand

Jaguar II is the newest generation of CLEARFIELD confection hybrids. **Jaguar II** offers improvements in seed size and color versus Jaguar. **Jaguar II** maintains the favorable characteristics that made Jaguar the leader in the confection market.

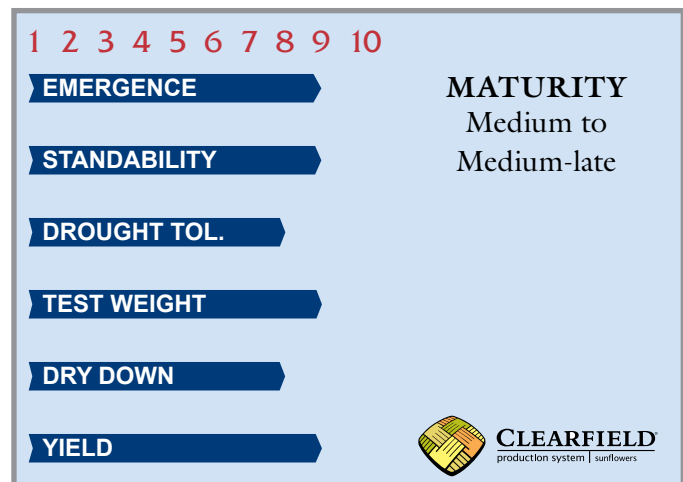

- Improved seed size, length and color
- Good standability
- Improved downy mildew protection
- Beyond herbicide tolerance

NEW Jaguar XL Brand

Jaguar XL is the newest generation of CLEARFIELD confection hybrids available on the market today. This hybrid offers improvements in seed size and color versus Jaguar. **Jaguar XL** will also maintain the favorable characteristics that made Jaguar the industry leader in the confection market.

- Improved seed size, length and color
- Good standability
- Widely adapted
- Improved plant health
- Beyond® herbicide tolerance

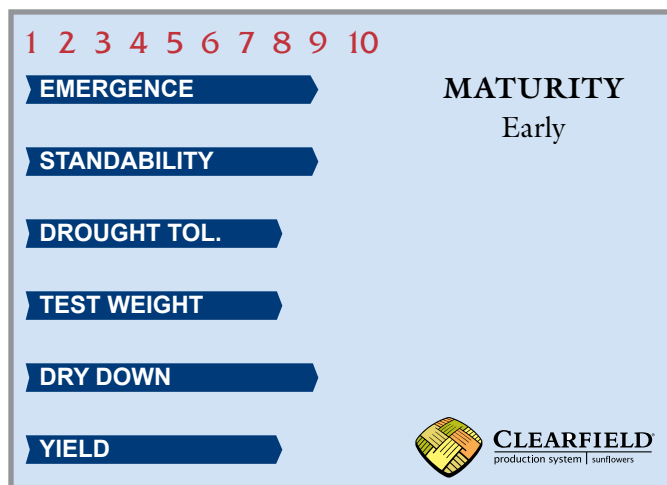

(CLEARFIELD® and Beyond® herbicide are registered trademarks of BASF. NuSun® is a registered trademark of the National Sunflower Association.)

Jaguar DMR Brand

Jaguar DMR is an early maturing, uniform single-cross, second-generation CLEARFIELD hybrid with resistance to multiple races of downy mildew. Jaguar DMR has long dark seeds suitable for in-shell markets.

- Large seed size
- Good stalk and root strength
- Resistant to multiple races of downy mildew
- Widely adapted
- Beyond herbicide tolerance

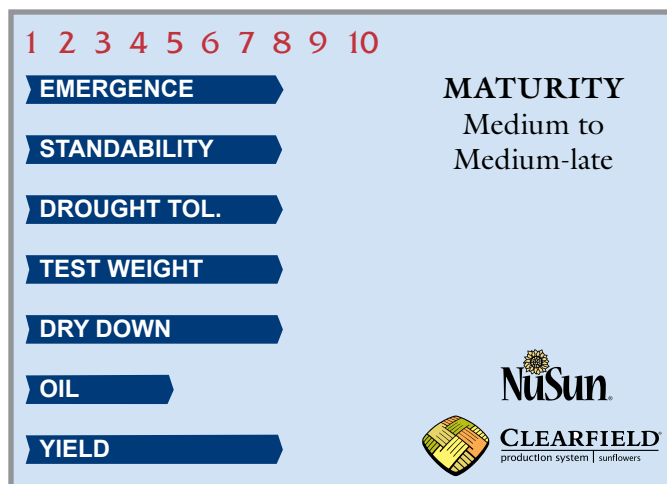

CLEARFIELD® Conoil

SEEDS 2000 Sunflower Hybrid

Badger CL Brand

The industry's first CLEARFIELD conoil hybrid, Badger CL is a very high yielding, uniform, single-cross hybrid with tolerance to the BASF herbicide Beyond®. Badger CL combines oilseed and confection genetics to produce a large seed that processors prefer for the hulling market.

- Uniform single-cross
- Excellent hullability and meat-to-hull ratio
- Excellent standability
- Excellent end-of-season plant health
- Beyond herbicide tolerance

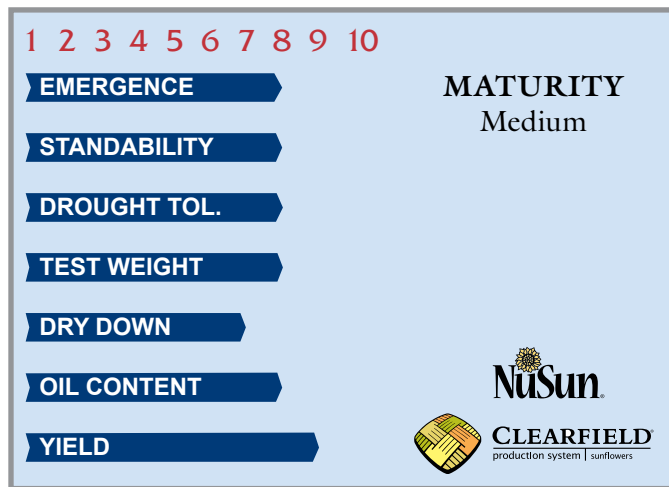

SEEDS 2000 Sunflower Hybrids

Camaro Brand

Camaro is a medium maturing, single-cross hybrid with stacked resistance to multiple races of downy mildew plus CLEARFIELD technology. **Camaro** has shown improved sclerotinia head rot tolerance and has good stalk and root strength. **Camaro** fits production in both northern and southern locations, and is suited to NuSun and bird food markets.

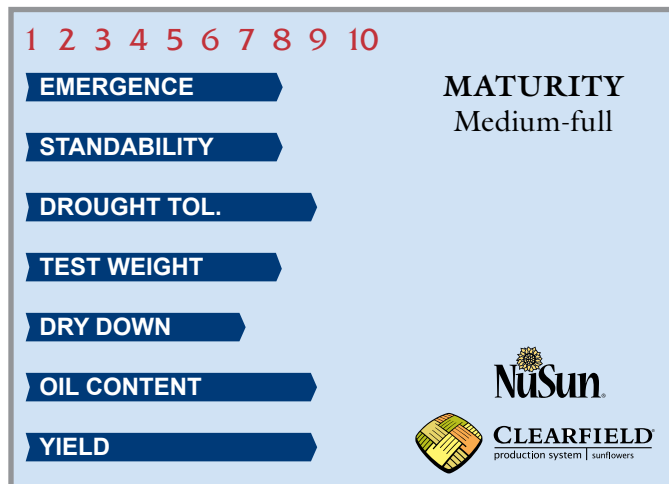

- Uniform single-cross hybrid
- Improved oil content
- Resistance to multiple races of downy mildew
- Improved head rot tolerance
- NuSun oil and bird food markets
- Beyond® herbicide tolerance

Torino Brand

Torino is a medium full maturing NuSun hybrid with CLEARFIELD technology. **Torino** offers very high yield potential with excellent late season plant health and improved sclerotinia head rot tolerance. Plant **Torino** in fuller season areas for NuSun and bird food markets.

- Improved oil content
- Very high yield potential
- Excellent late season plant health
- Improved sclerotinia head rot tolerance
- NuSun oil and bird food markets
- Beyond® herbicide tolerance

Traditional NuSun®

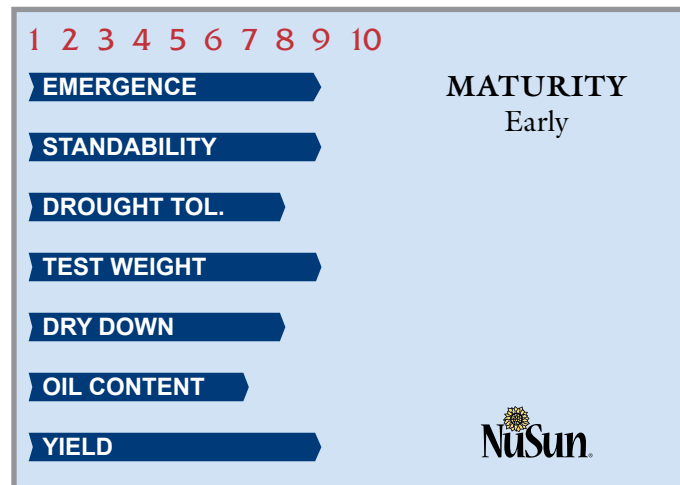

SEEDS 2000 Sunflower Hybrid

Defender Plus

An early maturity, uniform, single-cross NuSun® hybrid with resistance to multiple races of downy mildew. **Defender Plus** is adapted to northern areas where genetic resistance to downy mildew is needed, PLUS it offers growers the opportunity to sell into the dehull oilseed market. **Defender Plus** is suitable for the NuSun, dehull or bird food markets.

- Genetic resistance to multiple races of downy mildew
- Uniform single-cross hybrid
- Adapted to northern areas
- Excellent for NuSun, dehull or bird food markets
- Excellent plant health
- Large head with good center fill

High Oleic

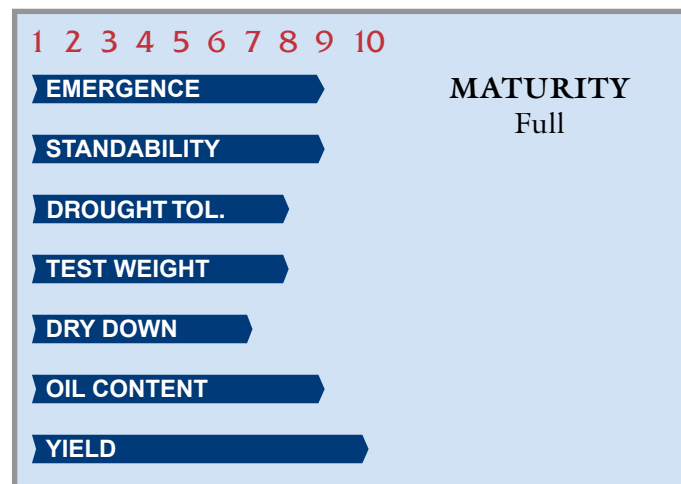

SEEDS 2000 Sunflower Hybrids

Sierra Brand

Sierra is a high yielding, high oleic hybrid best suited to full season, high yield environments. Combining very high yield potential with high oil content results in maximum oil production per acre.

- Very high yielding
- High oil content
- Excellent seed set and center fill
- Very good disease tolerance and plant health
- High oleic oil quality
- Best suited for full season, high yield environments

DuPont™ ExpressSun® Trait

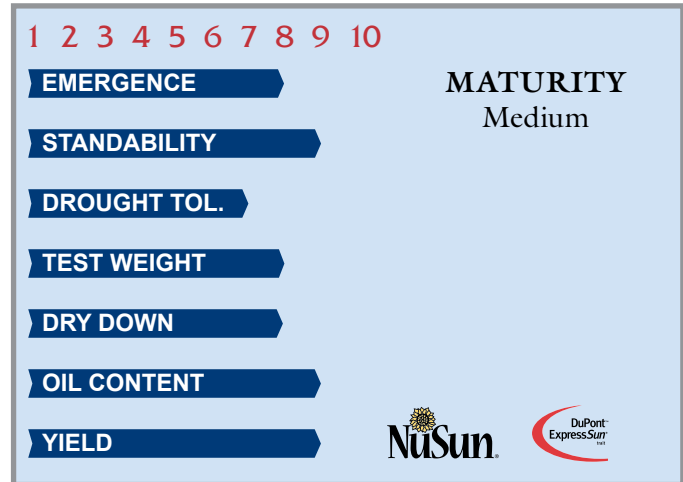

SEEDS 2000 Sunflower Hybrids

SEEDS 2000 is pleased to offer one of the first NuSun® hybrids available with the DuPont™ ExpressSun® trait, tolerant to DuPont™ Express® herbicide with TotalSol® soluble granules. The ExpressSun® trait system is designed to maximize weed control in sunflower, especially annual and perennial broadleaf weeds.

Falcon

Falcon is a medium maturing NuSun hybrid with Express® herbicide tolerance. This single-cross hybrid has excellent yield for maturity with a shorter plant height and very good stalk and root strength. **Falcon** has improved oil content and fits well for both the NuSun and bird food markets.

- Medium maturity single-cross hybrid
- Improved oil content
- Excellent stalk and root strength
- Shorter plant height
- NuSun oil and bird food markets
- Express® herbicide tolerance

Durango

Durango is a medium-full to full season hybrid with Express® herbicide tolerance. This single-cross NuSun® hybrid has improved oil content with excellent stalk and root strength. **Durango** has improved oil content and fits well into the NuSun and bird food markets, and performs best in full season production areas.

- Uniform single-cross hybrid
- Improved oil content
- Excellent stalk and root strength
- Shorter plant height
- NuSun oil and bird food markets
- Express® herbicide tolerance
